To update the Android binding simply replace KiipSDKXamarin.Droid/Jars/KiipSDK.jar and replace the art resources in KiipTouchArtResources. Rebuilding the project should generate the new binding.

To update the IOS binding first extract the static library file KiipSDK found under KiipSDK.framework/Versions/A/KiipSDK from the KiipSDK.framework. Rename the file to libKiipSDK.a. Copy the static library to KiipSDKXamarin.Touch/Resources and replace the art resources in KiipTouchArtResources. Rebuilding the project should generate the new binding.
